RAHUL MITRA

+65 8515 5413 | mitrarahul2002@gmail.com | linkedin.com/in/rahulmitra-dev | Portfolio | GitHub | **Expected Start Date: July 2027**

EDUCATION

National University of Singapore **Aug 2023 – Jul 2027**
Bachelor of Engineering, Industrial and Systems Engineering (GPA: 4.37/5.00)

- Pursuing a Second Major in Computer Science and a Minor in Mathematics.
- Awarded Certificate of Outstanding Performance in 3D Computer Vision (CS4277): top student in a class of 24, NUS School of Computing.

WORK EXPERIENCE

Warehouse AI & Operations Research Engineer (Part-Time), STMicroelectronics (NUS Capstone) **Aug 2026 – Present**

- Architected a layout-agnostic AI put-away engine reading each site's shelf coordinates, dimensions, and operating rules, so one model fits any STMicroelectronics warehouse without per-site rework.

Global Operational AI Systems & Data Engineer (Part-Time), Abbott Laboratories (Contract) **Jun 2026 – Present**

- Developed ADAM, an offline tool-calling LLM assistant (Gemma 4 E4B on llama.cpp) for 6 spray dryers across 4 global sites, letting engineers self-serve answers that previously needed APC specialists.
- Rebuilt 4 sites' Excel-based Advanced Process Control (APC) models as 7 steady-state gain models solved by HiGHS LPs and SLSQP QPs, returning setpoints, binding constraints, and shadow prices in milliseconds.

Data Analytics & Product Management Intern, Abbott Laboratories (Converted to Contract) **Jan 2026 – Jun 2026**

- Engineered a SimPy discrete-event digital twin and OR-Tools CP-SAT solver for hybrid flow-shop scheduling, comparing 3 approaches (heuristic, MIP, genetic algorithm) to produce decision-ready schedules.
- Validated a 15-stage changeover-data pipeline on 5 years of unseen raw data, with zero failures across operator and machine anomalies.

Software Engineer (Full Stack & Cloud), People's Association (Pro bono) **Sep 2025 – Sep 2026**

- Designed, built, and deployed Churp, a resident-driven garden-plot balloting platform now live in Tengah and slated for national rollout, seeded by a S$20K Sparks Community Innovation Fund award.

RESEARCH EXPERIENCE

Computer Vision Researcher, BlendED x Amazon Robotics (AI+X Global Challenge) **Jul 2026 – Oct 2026**

- Reproduced a published UNet super-resolution model in PyTorch from broken author code, training 12 models; matched reported results at 8x and came within 0.78 dB at 2x and 4x.
- Recognised by the project lead as one of the project's biggest contributors.

PROJECTS

Team Lead & Finalist, Swarmline: SG Defence Tech Hackathon (1,300+ applicants) **Sep 2026**

- Directed a 5-person team to architect decentralised drone-swarm coordination on correlated random-walk search, gradient-flow dispersion, delay-tolerant gossip, cross-inhibition consensus, and response-threshold task allocation.
- Implemented a deterministic Unreal Engine 5.8 C++ simulation with Claude Code; under a ground-link jam, 30 drones confirmed all 8 walking targets in 10 of 10 seeded runs, versus 2.1 of 8 on average for an operator-run fleet.

Finalist, Volt Pulse SG: SMU Hack For Cities (Top 8 Finalist of 50+ teams) **Jan 2026**

- Built an autonomous loop managing electricity and utility savings across multiple HDB households at once on SEALION embeddings, Supabase vector search, RRF routing, and scheduler-agent planning.

Team Lead, Maritime Deficiency Severity Forecasting: Maritime Hackathon **Jun 2025**

- Led model training for a maritime-inspection NLP system, fine-tuning a 109M-parameter BERT with DNN layers and gradient clipping on the ASPIRE 2A supercomputer.

CO-CURRICULAR ACTIVITIES AND VOLUNTEER EXPERIENCES

Elderly Care Volunteer, NTUC Health Active Ageing Centre **Sep 2025 – Sep 2026**

- Coordinated weekly senior-engagement activities, including home visits to check on residents' wellbeing, hear life stories, and help with everyday tasks, building empathy for accessible, community-focused product design.

NATIONAL SERVICE

Republic of Singapore Navy, Naval Chef & Base Support Assistant **Jan 2021 – Jan 2023**

- Compressed a month-long manual analysis of 6 months of food-waste data into a 3-minute Excel VBA report in a restricted environment.

SKILLS AND CERTIFICATIONS

Technical: CP-SAT, HiGHS linear programming, SLSQP quadratic programming, SciPy, hybrid flow-shop scheduling, SimPy, digital-twin simulation, robust optimization, graph optimization, network flow, Dijkstra/SSSP/APSP, decision analytics, statistics, AI tools (Claude Code, ChatGPT, Codex, Gemini, ComfyUI), Python, Excel VBA
Certifications: NVIDIA Disaster Risk Monitoring with Satellite Imagery
