# RAHUL MITRA

+65 8515 5413 | mitrarahul2002@gmail.com | linkedin.com/in/rahulmitra-dev | Portfolio | GitHub | **Expected Start Date: July 2027**

## EDUCATION

**National University of Singapore** **Aug 2023 – Jul 2027**
**Bachelor of Engineering, Industrial and Systems Engineering (GPA: 4.37/5.00)**

- Pursuing a Second Major in Computer Science and a Minor in Mathematics.
- Awarded Certificate of Outstanding Performance in 3D Computer Vision (CS4277): top student in a class of 24, NUS School of Computing.

## WORK EXPERIENCE

**Warehouse AI & Operations Research Engineer (Part-Time), STMicroelectronics (NUS Capstone)** **Aug 2026 – Present**

- Architected a layout-agnostic AI put-away engine ingesting each site's shelf coordinates, dimensions, and operating rules, letting one model adapt to any STMicroelectronics warehouse floor plan without per-site rework.

**Global Data Engineer (Operational AI Systems), Part-Time, Abbott Laboratories (Contract)** **Jun 2026 – Present**

- Developed ADAM, an offline tool-calling assistant on a locally hosted Gemma 4 E4B model (llama.cpp) answering spray-dryer setpoint, process, and signal questions for 6 dryers across 4 global sites, giving engineers self-serve answers to decisions previously requiring APC specialists, with rollout to Abbott servers scheduled.
- Built a Seeq signal-analytics toolkit (Kalman smoothing, Welch spectra, lag and coherence, PELT change points, matrix-profile motifs and discords, an 18-feature fingerprint) and a 5-stage offline handbook RAG pipeline: GPU OCR and layout parsing, recursive chunking, ONNX embeddings, a Chroma vector store, and LangChain retrieval.

**Data Analytics & Product Management Intern, Abbott Laboratories (Converted to Contract)** **Jan 2026 – Jun 2026**

- Developed a SimPy discrete-event digital twin and OR-Tools CP-SAT solver for hybrid flow-shop scheduling, then compared 3 approaches (heuristic, MIP, and genetic algorithm) to turn production objectives and constraints into decision-ready schedules.
- Trained regional engineering teams across Asia and Europe on repeatable AI workflows spanning 7 areas: prompting, model selection, benchmarks, cost awareness, agents, validation, and safeguards.

**Software Engineer (Full Stack & Cloud), People's Association (Pro bono)** **Sep 2025 – Sep 2026**

- Recruited into PA's Sparks Citizens Developer network as a community innovator in recognition of prior public-good initiatives, then designed, built, and deployed Churp, a resident-driven garden-plot balloting platform now live in Tengah and slated for national rollout, seeded by a S$20K Sparks Community Innovation Fund award.

## RESEARCH EXPERIENCE

**Computer Vision Researcher, BlendED x Amazon Robotics (AI+X Global Challenge)** **Jul 2026 – Oct 2026**

- Built vision systems turning raw camera feeds into perception-ready frames across 3 workstreams: camera ISP, super-resolution, and image restoration under real-world blur.
- Reproduced a published UNet super-resolution model in PyTorch from broken author code, recovering its undocumented evaluation protocol and training 12 models across 3 scales, 2 datasets, and 2 losses, matching reported results at 8x and landing within 0.78 dB at 2x and 4x.

## PROJECTS

**Team Lead & Finalist, Swarmline: SG Defence Tech Hackathon (1,300+ applicants)** **Sep 2026**

- Directed a 5-person team to architect decentralised drone-swarm coordination on correlated random-walk search, gradient-flow dispersion, delay-tolerant gossip, cross-inhibition consensus, and response-threshold task allocation.

**Finalist, Volt Pulse SG: SMU Hack For Cities (Top 8 Finalist of 50+ teams)** **Jan 2026**

- Integrated SEALION embeddings, Supabase vector search, RRF routing, and scheduler-agent planning into an autonomous loop managing electricity and utility savings across multiple HDB households at once.

**Team Lead, Maritime Deficiency Severity Forecasting: Maritime Hackathon** **Jun 2025**

- Led model training for a maritime-inspection NLP system, fine-tuning a 109M-parameter BERT with DNN layers and gradient clipping on the ASPIRE 2A supercomputer.

## CO-CURRICULAR ACTIVITIES AND VOLUNTEER EXPERIENCES

**Elderly Care Volunteer, NTUC Health Active Ageing Centre** **Sep 2025 – Sep 2026**

- Coordinated weekly senior-engagement activities, including home visits to check on residents' wellbeing, hear life stories, and help with everyday tasks, building empathy for accessible, community-focused product design.

## SKILLS AND CERTIFICATIONS

Technical: Python, PyTorch, BERT, DNN, RAG, AI agents, GPT-4, Gemini, Claude Code, ChatGPT, Codex, ComfyUI, SEALION, ONNX, Chroma, local LLM serving (llama.cpp), vector search, model evaluation, NLP; vision: camera ISP, super-resolution, image restoration, camera models and calibration, fundamental and essential matrices, epipolar geometry, absolute pose estimation, three-view geometry, structure-from-motion (SfM) with bundle adjustment, two- and multi-view stereo, generalised camera models; HPC: ASPIRE 2A, CUDA; deep RL (PPO, A2C, DDPG, DQN)
Certifications: NVIDIA Disaster Risk Monitoring with Satellite Imagery
